## Albuquerque, New Mexico - 2004 (N=53)

Figure A. Age of GISP participants, in years, 2004

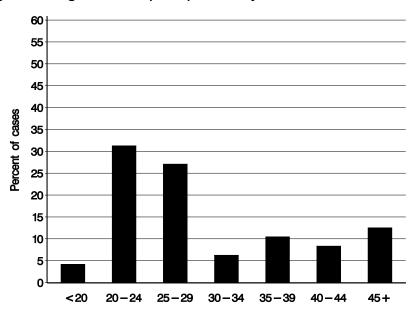

Figure C. Percentage of GISP participants identifying as men who have sex with men, 1988 – 2004

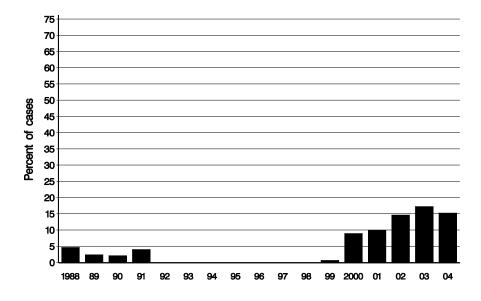

Figure B. Race/ethnicity of GISP participants, 2004

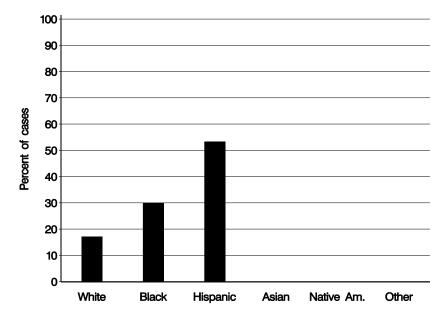

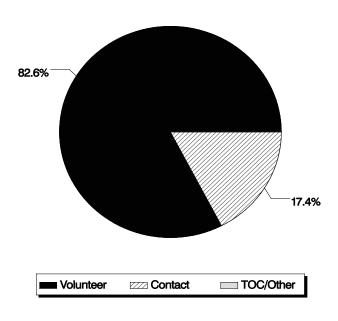

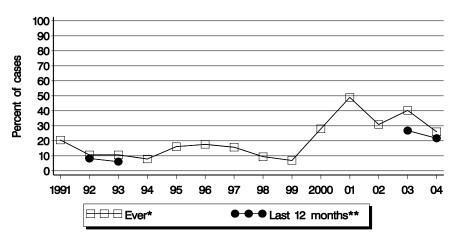

Figure D. Reason for visit among GISP participants, 2004

## Albuquerque, New Mexico - 2004 (N=53)

Figure E. Previous episode of gonorrhea among GISP participants, 1991 – 2004

<sup>\*</sup>Data first collected in 1991.

Note: Data points not shown when >30% data missing.

Figure G. Drugs used to treat *Chlamydia trachomatis* infection among GISP participants, 2004

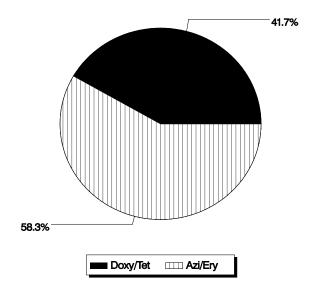

Figure F. Drugs used to treat gonorrhea among GISP participants, 2004

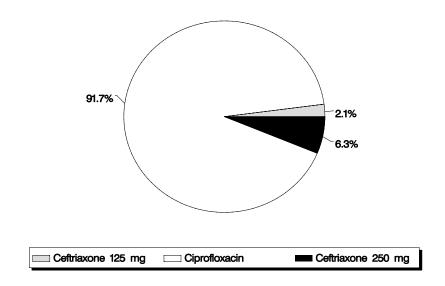

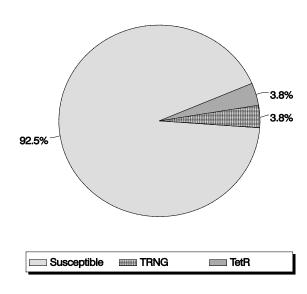

Figure H. Resistance to penicillin and tetracycline among GISP isolates, 2004

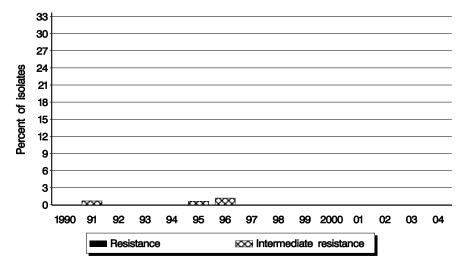

<sup>\*\*</sup>Data first collected in 1992.

## Albuquerque, New Mexico - 2004 (N=53)

Figure I. Decreased susceptibility to ceftriaxone among GISP isolates, 1988 – 2004

No isolates with decreased susceptibility to ceftriaxone have been identified at this clinic.

Figure K. Intermediate resistance and resistance to ciprofloxacin among GISP isolates, 1990-2004

Note: Susceptibility to ciprofloxacin first measured in 1990.

Figure J. Decreased susceptibility to cefixime among GISP isolates, 1992 – 2004

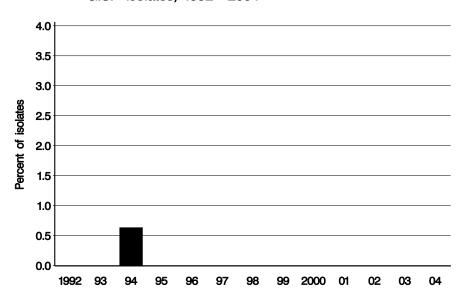

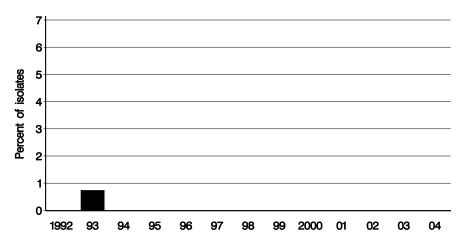

Figure L. Decreased susceptibility to azithromycin among GISP isolates, 1992-2004

Note: Susceptibility to azithromycin first measured in 1992.

Note: Decreased susceptibility to azithromycin is defined here as  $\ge$  1.0  $\mu$ g/ml.

No NCCLS criteria currently exist.
